PROFILE SUMMARY

Creative and results-driven Front-End Developer with a strong foundation in modern web technologies and a passion for building seamless, high-performance user experiences. Currently delivering real-world impact through active government and private-sector projects — developing a platform for the Ghana Education Service (GES-Ho) and a landing page for NodeEight. Skilled in React, Next.js, Tailwind CSS, Node.js, and Firebase, with a proven ability to turn complex requirements into clean, responsive interfaces.

TECHNICAL SKILLS

Front-End	HTML5 • CSS3 • JavaScript (ES6+) • React • Next.js • Tailwind CSS
Back-End	Node.js • PHP • Firebase (Firestore, Auth, Hosting)
Tools	Git • GitHub • VS Code • Responsive Design • Cross-Browser Compatibility
Practices	Component-Based Architecture • Performance Optimization • Debugging • REST APIs

EXPERIENCE

React Developer — GES-Ho (Ghana Education Service)

Ongoing • Ho, Ghana (Government Project)

- ▶ Building a React-based platform for the Ghana Education Service regional office in Ho.
- ▶ Implementing dynamic UI components, routing with React Router, and data management with Firebase.
- ▶ Collaborating directly with government stakeholders to meet project specifications.

Front-End Developer — NodeEight (Landing Page Project)

Ongoing • Remote

- ▶ Designing and developing a modern, conversion-focused landing page using Next.js and Tailwind CSS.
- ▶ Ensuring pixel-perfect responsiveness across all screen sizes and devices.

Freelance Front-End Developer

January 2024 – Present • Remote

- ▶ Developed responsive websites and landing pages for small businesses using React & Tailwind CSS.
- ▶ Delivered full-cycle solutions from design to deployment on platforms like Netlify.

FEATURED PROJECTS

Personal Portfolio Website

- ▶ Built with React + Vite, featuring project showcases, smooth animations, and responsive layout.
- ▶ Deployed live at mycollinsportfolio.netlify.app — visit to see the full design and project lineup.

Task Management Application

- ▶ Dynamic task manager built with JavaScript and Firebase for real-time data sync and authentication.

Car Rental Website

- ▶ Full React SPA with browsable car listings, booking flow, and mobile-first responsive design.

Voting Management System — HTU Project

- Web-based voting platform built with PHP and MySQL to streamline SRC elections at Ho Technical University.

EDUCATION

B.Sc. Information Technology — Ho Technical University

2022 – Present • Ho, Ghana
