

COLLINS AGBO

Software Engineer

Ho, Ghana | +233 55 943 8418 | agbocollins15@gmail.com | mycollinsportfolio.netlify.app | github.com/cadsix

PROFILE

Software Engineer with hands-on experience building production web applications end-to-end, from responsive front-end interfaces to backend integrations and deployment. Skilled in React, Next.js, Node.js, Supabase, and Firebase, with a proven ability to turn requirements into clean, scalable solutions — complemented by a working knowledge of graphic design and UI/UX.

EXPERIENCE

Software Developer (National Service) — *NodeEight* 2025 – 2026

- Built and managed multiple web portals as part of national service, including platforms for Lafyai and Afiyai.
- Handled end-to-end development across front-end interfaces and backend integrations for four production portals.
- Set up authentication, database structures, and API integrations to support core platform features.

Freelance Software Engineer — *Self-employed* January 2024 – Present

- Delivered full-cycle web development for clients including StreetsideMart and Ghana Education Service, from design through deployment.
- Built responsive websites, landing pages, and custom web applications tailored to each client's needs.
- Provided graphic design support alongside development for select client projects.

FEATURED PROJECTS

Lafyai & Afiyai Portals: Multiple production portals built during national service, covering authentication, database schemas, and API integrations.

StreetsideMart: Freelance client project — a responsive business website with a modern, mobile-first design.

GES Education Platform: React-based platform with dynamic UI components and data management, built for a freelance client.

Personal Portfolio Website: Built with React and Vite, featuring project showcases, smooth animations, and a responsive layout.

Task Management Application: Dynamic task manager built with JavaScript and Firebase for real-time data sync and authentication.

Car Rental Website: Full React single-page app with browsable car listings, a booking flow, and mobile-first responsive design.

Voting Management System: Web-based voting platform built with PHP and MySQL to streamline SRC elections at Ho Technical University.

TECHNICAL SKILLS

Front-End: HTML5, CSS3, JavaScript (ES6+), React, Next.js, Tailwind CSS

Back-End & Data: Node.js, Supabase, PHP, Firebase (Firestore, Auth, Hosting)

Design: Graphic Design, UI/UX Design, Figma-based Mockups

Tools & Practices: Git, GitHub, VS Code, Responsive Design, Cross-Browser Compatibility, Component-Based Architecture, Performance Optimization, REST APIs

EDUCATION

B.Sc. Information Technology — *Ho Technical University* 2025 – 2027 (Expected)

HND Information Technology — *Ho Technical University* Completed 2025

CERTIFICATIONS

Responsive Web Design: freeCodeCamp

JavaScript Algorithms & Data Structures: freeCodeCamp

React: Scrimba
