PROFILE SUMMARY

Creative and results-driven Software Engineer with a strong foundation in modern frontend architecture and full-cycle web development. Experienced building production web applications across digital health platforms (**Afya**, **Lafyai**), government educational portals (**GES-Ho**), and e-commerce solutions. Skilled in React, Next.js, Tailwind CSS, Node.js, Supabase, and Firebase, with a proven ability to turn complex operational workflows into clean, high-performance, and responsive user experiences.

EXPERIENCE

Software Engineer — Node Eight

Ho, Ghana / Remote

Community Health & Digital Innovation Platforms (Afya & Lafyai)

- Collaborated on engineering health-tech web platforms including **Afya** ([useafyai.com](#)) and **Lafyai** ([lafyai.com](#)) to support community health workers and care coordinators.
- Built responsive interfaces integrated with WhatsApp workflows and automated messaging pipelines for patient screening and triage.
- Translated Figma prototypes into production code, optimizing performance for mobile viewports in low-connectivity areas.

Software Engineer (Contract) — Lafyai

Remote

Childhood Immunization & Care Adherence ([lafyai.com](#))

- Architected and built the web application using **Next.js**, **Tailwind CSS**, and **Supabase** (Auth, PostgreSQL data layer).
- Implemented clinic caregiver registration flows (<60s onboarding) and automated behavioral reminder triggers to reduce vaccine drop-offs.

React Developer — GES-Ho

Ongoing • Ho, Ghana

Ghana Education Service Regional Office Portal

- Developing a centralized React web platform with Firebase backend (Firestore, Authentication) for regional administrative workflows.
- Collaborating directly with public sector stakeholders to translate reporting requirements into dynamic, intuitive dashboard interfaces.

Freelance Software Engineer

2024 - Present

- Delivering full-cycle web applications and e-commerce solutions (such as Streetside Mart) with modern payment integrations (MTN MoMo, Telecel Cash).

FEATURED PROJECTS

Afya — Community Hypertension Screening ([useafyai.com](#))

WhatsApp-native health platform enabling field workers to log BP readings on-site and send automated, jargon-free health updates and follow-up queues.

Streetside Mart — Essentials Storefront ([streetside-mart.vercel.app](#))

Next.js e-commerce storefront for Ghanaian households featuring instant product search, starter bundles, and local Mobile Money checkout.

EDUCATION

B.Sc. Information Technology

2025 - 2027 (Expected)

Ho Technical University • Ho, Ghana

HND Information Technology

Completed 2025

Ho Technical University • Ho, Ghana
